

Circle sizer

Natural Rings | Wedding & Engagement

www.woodenringstore.com.au | hello@woodenringstore.com.au | 02 4735 2705

Located in Emu Heights, Sydney

How to Use This Ring Sizer

1. **Print at 100% scale** - Do not resize or scale this document when printing
2. **Place existing ring** over the circles below, matching the inside edge of your ring
3. **Choose the closest match** - If between sizes, select the half size. For example if the ring is smaller than N but bigger than M select M½
4. **Verify with ruler** - Double-check by measuring the circle diameter with a ruler

This method provides approximate sizing only for finding out a size of an existing ring that fits. Generally, we recommend professional measurement or our physical ring measuring kit for guaranteed accuracy.

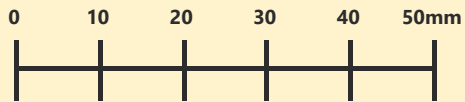

Additional Sizing Guidelines if using Measuring Kit or measuring at a Jewellers

1. **Best measuring time:** Late afternoon when fingers are at normal size
2. **Temperature matters:** Avoid measuring when very hot, cold, or after exercise
3. **Ring width consideration:** Wider bands (6mm+) typically need 0.5 or 1 size larger if measured with narrow sizers
4. **Australian climate:** Summer heat and humidity may require 0.5 size larger
5. **Professional backup:** Visit any local jeweller for verification
6. **Multiple measurements:** Take 3 measurements and average the results

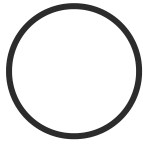

Free Ring Measuring Kit: For the most accurate home measurement, order our professional ring measuring kit at woodenringstore.com.au. We'll deduct the kit cost from your ring purchase!

Scale Verification - MEASURE THIS FIRST!

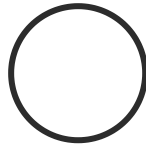

Before using the ring sizer: Use a ruler to verify this scale measures exactly 50mm. If not, adjust your print settings and reprint.

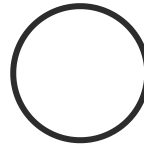

This scale must measure exactly 50mm with a ruler. Each printer may scale differently, so verification is essential for accurate ring sizing.
